PROFESSIONAL SUMMARY

Senior Unity Developer with 12+ years of experience in game development using the Unity engine and C#. Experienced in the full development lifecycle, from concept and architecture to implementation, optimization, and release. Strong background in gameplay systems, UI development, multiplayer architecture, and performance optimization across PC, mobile, and VR platforms. Proven ability to design scalable systems, solve complex technical challenges, and collaborate effectively with multidisciplinary teams.

SKILLS

- Programming
- Unity Engine (3D / 2D)
- Performance Optimization
- Game Development
- UI Systems Development
- Procedural Content Generation
- Multiplayer & Networking
- Client/Server Architecture
- Platforms
- Mobile (iOS / Android)
- VR/AR
- Oculus Rift
- GearVR
- Graphics
- Rendering Optimization
- C#
- Software Architecture & Design Patterns
- Debugging & Profiling
- Gameplay Systems Development
- Tools Development
- Multiplayer Systems
- Photon Fusion
- Networked Gameplay Systems
- PC (Steam)
- WebGL
- VR / AR
- Oculus Quest
- Google Cardboard
- Shader Development

WORK HISTORY

May 2025 - Current

Limit Break - Senior Unity Developer, Remote

- Developed UI systems and gameplay features for PC games using Unity.
- Implemented modular UI components ensuring a responsive and polished player experience.
- Developed core gameplay mechanics and tools that allowed designers to rapidly iterate on features.
- Collaborated with artists and designers to integrate UI assets and maintain visual consistency.

- Debugged complex issues and optimized UI performance across different PC configurations.
- Maintained code quality through coding standards and code reviews.

May 2024 - May 2025

SKR Games - Senior Unity Developer, Remote

- Developed and maintained gameplay systems for mobile games using Unity and C#.
- Implemented core gameplay mechanics, UI systems, and gameplay features.
- Optimized game performance through profiling and refactoring for various mobile devices.
- Integrated third-party SDKs including analytics and platform services.
- Investigated and resolved complex bugs while maintaining stable builds.
- Contributed to feature planning and improvements to project architecture.

December 2023 - May 2024

Playgendary - Senior Unity Developer, Remote

- Improved game performance through profiling and optimization of system bottlenecks.
- Collaborated with artists and animators to integrate and optimize visual assets.
- Contributed to live game updates, feature development, and bug fixes for a high-traffic mobile title.
- Reduced development time by improving code quality and refactoring systems.
- Participated in rapid iteration cycles common in hyper-casual game development.

March 2022 - November 2023

GOAT Games Entertainment - Lead Unity Developer, Chisinau

- Led development of small PC games for Steam using Unity.
- Established coding standards to maintain consistent code quality.
- Mentored junior developers and supported team collaboration.
- Diagnosed and resolved complex technical issues while maintaining performance.
- Reported development progress and technical updates to stakeholders.

March 2019 - March 2022

Iron Will - Lead Unity Developer, Chisinau

- Developed AR and VR applications using Unity.
- Participated in development of a MOBA prototype until MVP stage.
- Implemented multiplayer systems using Photon Fusion.
- Designed scalable architecture for complex gameplay systems.
- Implemented performance-critical systems for real-time applications.
- Contributed to gameplay improvements through playtesting feedback.

February 2017 - May 2019

Redox Entertainment - Senior Unity Developer, Chisinau

- Refactored existing projects to meet modern industry development standards.
- Developed new game projects from concept to production.

- Implemented VR and AR solutions for platforms including GearVR and Oculus Rift.
- Optimized performance for VR and WebGL deployments.
- Developed internal tools to support development workflows.
- Implemented integrations with external APIs and services.
- Developed custom shaders and technical tools.

September 2013 - January 2017

01Devs - Unity Developer, Chisinau

- Developed multiple Unity games from concept to deployment.
- Built custom level editors and development tools.
- Implemented systems for achievements, leaderboards, and encrypted save data.
- Developed real-time procedural generation systems for meshes, textures, levels, and items.
- Integrated third-party SDKs including Facebook SDK, in-app purchases, achievements, and analytics.
- Designed scalable software architecture for game systems.

January 2013 - March 2013

ITProlab

- Contributed to development of a large enterprise project using Silverlight.
- Worked with large MySQL databases to improve performance and reliability.
- Implemented a search engine solution that significantly reduced database query time.
- Developed bug fixes and system improvements for future releases.
- Collaborated with product management to design and test system features.

ADDITIONAL INFORMATION

Information about developed projects can be provided on request.
